Digital personal scales

General information

Tempered-glass personal weighing scales to perform regular weight checks. With a 1.5” LCD display measuring four fitness indicators: weight, body fat, muscle and bone mass, while taking into account, age, height and life style.
They also feature three measurement unit options (kilograms, stones or pounds), which is very convenient is on a diet that works with a different unit than the one you are used to.
In addition, these scales can store up to 10 different user profiles, enabling various users to keep track of their weight.
